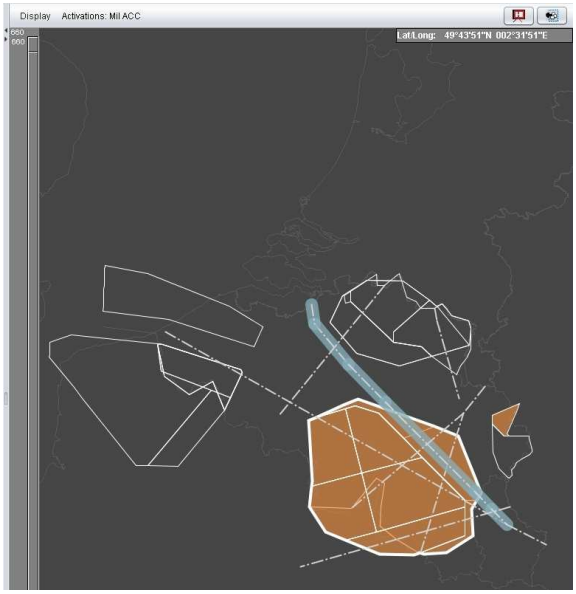
# LARA NOTICE

Number 01/2011
Issued on 27-06-2011
Valid until: LARA Release V2.1
Issued by JS/LARA Team

## LARA V2.0 Airspace Status Filter Issue

1. Do not use the Filter Option on the Airspace Status Display (ASD) to filter out inactive airspaces – it does not function properly.

2. If the filter is selected to only show active airspaces, the filter operates properly and removes all inactive airspaces from view. However, if in the meantime new airspace becomes active, they are not showing through the filter. The fault report is launched and the issue will be fixed in LARA V2.1.



In case of any questions please contact the LARA Team
